

PRESS RELEASE – 2023 constructsteel Awards winners announced

26 September 2023 | Brussels, Belgium

The constructsteel Awards recognise exceptional achievements in the steel construction sector spanning a one-year period. These awards celebrate outstanding projects in three distinguished categories:

Innovation of the Year:

- Australia - Quadshore for the world-leading lightweight propping solution for temporary construction works

Excellence in Sustainability:

- South Korea - POSCO Innovilt for the Zero Energy Villas

Best Project of the Year:

- Japan - Taisei Corporation for the Japan National Stadium

#Ends#

Notes

- constructsteel is the steel construction market development programme of the [World Steel Association](#). Bringing together 13 major global steel producers, our mission is to elevate steel as the ultimate choice in construction, foster sustainability, and communicate its unparalleled advantages to construction stakeholders worldwide.
